

THE 2HR AQUARIST

**APT**  
easy victory

## THE 2HR AQUARIST

Enjoy the freedom to breed shrimps in softwater tanks, and enable hardwater and softwater plants to thrive side-by-side.

	 NO MINERALISER	 CONVENTIONAL MINERALISERS	 APT SKY
 PLANT GROWTH IMPACT	OK if species fit water parameters.	Inconsistent. Most alter NPK and interfere with fertilisers.	Expands optimal growth zone without affecting NPK.
 SHRIMP BOOST	OK if species fit water parameters.	Shrimp-focused mineralisers often lack minerals that plants need.	Calcium and minerals that are optimized for shrimp and plants.
 GH BOOST EFFICACY	Not applicable.	Generally inefficient. e.g. 16g per 80L ▶ +3dGH = 3.5g per 60L ▶ +0.9 dGH	Approx 3X more powerful. 3.5g per 60L ▶ +2.5 dGH
 RO REPLENISHMENT	Not applicable.	Suboptimal ratio of Ca/Mg and other minerals.	Optimal Capstone™ ratio of vital trace minerals and seaweed extract.

APT SKY 800g

APT SKY 150g

Overleaf: 1-Bacopa salzmannii, 2-Rotala 'blood red SG', 3-Syngonanthus lago grande, 4-Lobelia cardinalis, 5-Cryptocoryne flamingo, 6-Centrolepis Drummondiana, 7-Eriocaulon quinquangulare
