

The logo for AquaEl, with 'AQUA' in black and 'EL' in red.

AQUAEL

Thermometer Link

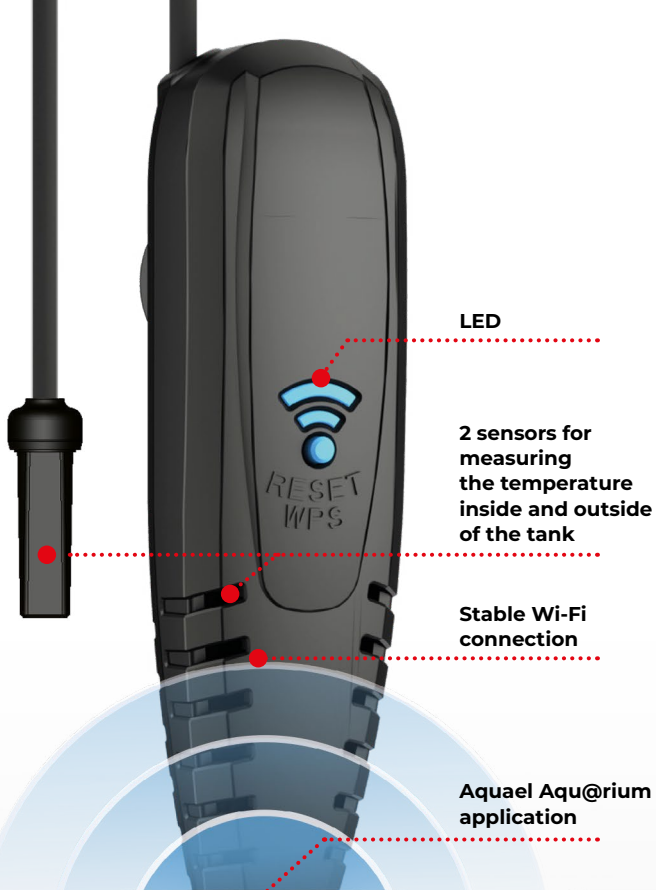

Measures, alerts and stores data in memory

The first **electronic thermometer** controlled via the **AquaEl Aqu@rium** mobile application. Enables the desired temperature range to be set (the minimum and the maximum value). When the temperature is outside of the set range, the application sends **alarm notifications**. The device **records** and **stores temperature data** for conditions inside and outside of the tank. Accessing and analysing complete data has never been so easy. The thermometer is designed for fresh water and salt water aquaria as well as terraria.
